## Marketing Copy

The AquaScape Large Snorkel® Vault and Cap provides an easy way to clean wetland filtration systems. Simply lower a pump down into the vault for quick and simple cleaning. Wetland filtration is designed to help strip excess nutrients from the water, tackling issues that commonly plague large-scale water features. The vault also reduces the need for costly and invasive dredging. Four optional ports for AquaScape Large Centipede® Module attachment are included to allow installation in a wide variety of applications. The vault can also be easily retrofitted into existing ponds, and the included cap allows the top of the Snorkel® to be easily concealed and hidden from sight.

Feature - Benefit Bullet 1 Provides an easy way to clean wetland filtration systems

Feature - Benefit Bullet 2 Reduces the need for costly dredging

Feature - Benefit Bullet 3 Included cap is easily disguised

Feature - Benefit Bullet 4 Included cap is easily disguised
