The AquaScape Large Centipede® Module sits at the lowest point of the wetland filter and helps to efficiently remove sediment, decreasing maintenance and increasing water quality. Wetland filtration is designed to help strip excess nutrients from the water, tackling issues that commonly plague large-scale water features. The Large Centipede® is modular in design and works on both earth-bottom and lined ponds, allowing for installation on a wide variety of projects. The Centipede® is easily retrofitted into existing ponds and is ideal for use with the AquaScape Large Snorkel® Vault.

Feature - Benefit Bullet 1	Efficiently removes sediment
Feature - Benefit Bullet 2	Decreases maintenance and increases water quality
Feature - Benefit Bullet 3	Modular
Feature - Benefit Bullet 4	Modular
Feature - Benefit Bullet 5	67" long, 10.5" tall, and 13" wide
