The Aquascape Water Fill Valve 200 automatically adds water to your pond, waterfall, or fountain when needed. Adding a fill valve will help to reduce time spent filling your water feature and protects your pump from running dry in the case of water loss. Slow addition of water also helps to contribute to a healthy ecosystem by preventing large chemistry swings associated with adding large amounts of water at once. The valve's small size and ability to handle up to a 3 gallons per minute flow rate (up to 100 PSI) allow the valve to be installed into a wide variety of water feature applications. The valve includes fittings to connect to standard garden hose ½" poly pipe and ½" PVC pipe.

Feature - Benefit Bullet 1 Automatically adds water to your water feature

Feature - Benefit Bullet 2 Reduces time spent filling your feature

Feature - Benefit Bullet 3 Handles up to 3 GPM

Feature - Benefit Bullet 4 Handles up to 100 PSI
